

**AMENDMENTS TO THE CLAIMS**

The listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims**

Claims 1 - 8 (Cancelled)

9. (Currently Amended) An image formation apparatus comprising:
  - an input unit entering image data,
  - a printer unit printing image data,
  - a memory storing trigger information to initiate execution of a plurality of control operations ~~and in association with~~ said control operation in correspondence ~~operations~~,
  - a detector detecting additional information including said trigger information from said image data, and
  - a controller responsive to detection of said trigger information to sequentially execute said control operations corresponding to said trigger information stored in said memory,
  - wherein ~~one~~ one of said control operations includes ~~include~~ a ~~transmission~~ operation transmitting print information related to printing of said image data to a destination.
  
10. (Currently Amended) The image formation apparatus according to claim 9, further comprising an operation unit setting said trigger information ~~and in association with~~ said control operations ~~in correspondence~~.

11. (Original) The image formation apparatus according to claim 9, wherein said print information includes information indicating an event of printing said image data.

12. (Original) The image formation apparatus according to claim 9, wherein said print information includes a print condition in printing said image data.

13. (Currently Amended) The image formation apparatus according to claim 9, wherein ~~one~~~~of~~ said control operations includes include a print operation printing out said image data according to a predetermined print condition.

14. (Currently Amended) The image formation apparatus according to claim 9, wherein ~~one~~~~of~~ said control operations includes include an image processing operation processing said image data according to a predetermined image processing condition.

15. (Currently Amended) The image formation apparatus according to claim 9, wherein said ~~transmission operation~~ includes control operations include an operation of transmitting said print information to a destination specified by an electronic mail address through electronic mail.

Claim 16 (Cancelled)

17. (Currently Amended) An image recording apparatus comprising:  
an input unit entering image data,  
a record unit recording input image data on a recording medium,

a detector detecting additional information from said image data, said additional information including trigger information to initiate execution of a plurality of predetermined control operations, and

a controller sequentially executing said predetermined control operations in response to detection of said trigger information,

wherein ~~one-of~~ said predetermined control operations ~~includes~~ include a transmission operation transmitting information related to recording of said image data to a destination.

Claims 18 - 19 (Cancelled)
